

Regional Foot & Ankle Center at OMNI

Part of our
growing team
of excellence

OMNI Orthopaedics is proud to announce the opening of the OMNI Regional Foot and Ankle Center, home of the most advanced, comprehensive foot and ankle care in Stark County. This specialized center brings together a team of specialists highly trained in the diagnosis, non-surgical treatment, and surgical treatment of simple and complex foot and ankle disorders.

The OMNI Regional Foot and Ankle Center – Advanced, comprehensive care for the foot and ankle

Outstanding expertise & centralized care

The creation of such a center under one roof enables our patients to be examined and receive treatment by different specialists at a single visit. This allows for more convenient and improved patient care, due to direct communication and interaction among the specialists.

The Director of the Foot and Ankle Center is Daniel A. Charlick, M.D., a board certified orthopaedic surgeon and fellowship-trained foot and ankle specialist. He has completed one year of additional training concentrating exclusively on foot and ankle disorders. Other central members of the team include Ronald B. Cohen, D.P.M., a board-certified doctor of podiatric medicine and surgery; Stacie, clinical assistant to Dr. Cohen; and Stephanie, clinical assistant to Dr. Charlick.

Other specialists at our Medical Center include orthopaedic technicians (experts in cast application and care), physical therapists, as well as general orthopaedic surgeons.

Our team treats a wide variety of disorders

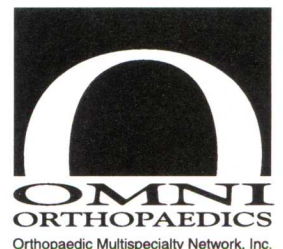

Each individual on our staff is an integral part of the team, and together, they provide the framework for comprehensive, advanced foot and ankle care for adults and children. We excel in the treatment of both straightforward problems—such as calluses, warts, hammer toes and bunions—as well as more complex disorders—such as pediatric deformities, chronic ankle pain and instability, acute and chronic sports injuries, fractures and dislocations of the foot and ankle, and diabetic foot disorders.

The Facilities at OMNI Medical Center

The Foot and Ankle Center is housed within the state-of-the-art facilities of OMNI Medical Center. This 43,000-square-foot medical complex offers a variety of services. Facilities provided for our foot and ankle patients include podiatric rooms with specialized chairs and instruments, a large modern cast room, a physical therapy clinic, bracing and custom splinting and onsite MRI services.

The OMNI Regional Foot and Ankle Center is located at 4760 Belpar Street in Canton, Ohio.

To schedule an appointment, please call
(330) 492-9200 or 1-800-742-0345.
